VP of Manufacturing

We currently seek a high caliber VP of Manufacturing for a long-term basis within our client's team of experienced professionals. Based in Austin, TX.

We are seeking a highly skilled Vice President of Manufacturing to oversee all aspects of our manufacturing operations. The ideal candidate will have a background in steel manufacturing and design, with experience managing large-scale operations and a track record of success in improving efficiency and profitability

Job Requirements

- Develop and implement strategies to optimize manufacturing processes and increase efficiency
- Manage daily manufacturing operations, including production schedules, staffing, and resource allocation
- Directly oversee all aspects of the manufacturing process, including design, layout, assembly, and quality assurance
- Collaborate with other departments to ensure seamless coordination of manufacturing with inventory management, logistics, and customer service
- Monitor and analyze production data to identify areas for improvement and implement corrective actions
- Ensure compliance with all safety, quality, and environmental regulations and standards
- Lead and mentor a team of managers and supervisors to drive employee engagement, development, and retention

Qualifications:

- Bachelor's degree in engineering, management, or a related field; advanced degree preferred
- 10+ years of experience in steel manufacturing, with a proven track record of success in managing large-scale operations
- Expertise in PEMB (Pre Engineered Metal Building) and MBS (Metal Building Systems) design and manufacturing
- Deep understanding of steel manufacturing processes and technologies, including welding, forming, cutting, and finishing
- Strong leadership and management skills, with the ability to motivate and inspire teams to achieve exceptional results
- Excellent communication and interpersonal skills, with the ability to collaborate effectively across all levels of the organization
- Experience with Lean Manufacturing and Six Sigma methodologies preferred
- Strong analytical and problem-solving skills, with the ability to identify and resolve complex manufacturing issues
- Experience with ERP systems and other manufacturing software tools
- Commitment to safety, quality, and continuous improvement

*****Notice to Candidates:** Background checks are carried out as part of any conditional offer made, including (but not limited to & role dependent) education, professional registration, employment, references, passport verifications and Global Watchlist screening**.**

To be Considered Candidates: Must be authorized to work in the USA without sponsorship***
